

How to modify an existing transaction

Spark allows you to modify an order after it has been submitted. To do so, open the 'Executions' report or the 'Transaction History' - 'Transaction (H)'

Once you see the report in the screen, choose the order you would like to modify by double clicking on its row.

Now you can modify any necessary parameter in the ticket. The changes will take effect once you click on 'Replace', as you see in the following screenshot.

The screenshot shows the 'Edit Order' window for a 'Sell Short' transaction. The window title is 'Edit Order : SS 32300 (0 left) AVAV US @ 0 MKT'. The 'Order Entry' tab is active, showing various order parameters on the left side, including Instructions (Market), Limit Price (0,0000), Stop Price (0,0000), Target (32,300), Working (32,300), Filled (32,300), Leaves (0), Broker (JPM), Commission (0,0500 CPS), Avg. Price (60,7599983215000), Net Price (60,7100), Price Cncy (USD), Settle Cncy (USD), F/X Rate (1,000000000), Ref. F/X (1,000000000), Trade Date (15/02/2022), Settle Date (15/02/2022), and Trader (ATHENAOPS). The central area shows the 'Security' section with Identifier (AVAV US) and Description (AeroVironment Inc.). Below this is the 'Allocations' section with a table showing account details. The 'Replace' button at the bottom is highlighted in red.
